

REMARKS

Reconsideration of this application as amended is requested. By this amendment Applicant has amended the drawing Figs. 2, 5 and 6, has amended the specification at page 7, and has amended claim 19. Claims 1-20 remain in the case.

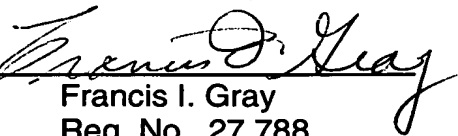

The Examiner objected to the drawing Figs. 2 and 5 because the earth ground symbols were not labeled. Applicant has amended these Figs. accordingly. Applicant also has amended Fig. 6 which had a redundant label ("618") referencing two different elements. The processor label has been corrected to now read "616" to eliminate this redundancy. Clean sheets of the drawing are attached reflecting these amendments. Correspondingly the specification at page 7 has been amended to change the reference numeral for the processor from "618" to "616". Applicant submits that the Examiner's objections are now moot.

The Examiner further objected to claim 19 because it was not clearly stated that the first and second grounds are electrically isolated. Applicant has amended claim 19 to recite "the first and second grounds being electrically isolated", thus rendering the Examiner's objection moot.

In view of the foregoing amendment and remarks, and the Examiner's indication that claims 1-20 are allowable over the prior art of record, Applicant submits that this case is now in condition for allowance.

Respectfully submitted,

DAVID F. HILTNER
